

GURU ASHISH PLASTIC

PE/HDPE FISHING TWINE

PE/HDPE fishing twine are made of complete virgin High-Density Poly-Ethylene granules. Excellent tensile strength and flexibility make them widely demanded across the globe. Polyethylene is a lightweight and strong fishing purpose twine. It is rot proof and unaffected by water, oil, gasoline, and most chemicals.

RANGE OF ROPE:

PLY	: 18 ply TO 120 ply
Colour	: Yellow, Blue, Green, Orange, Red, White, Brown, Pink
Twist	: Single Twisting
Hank weight	: 50 gram to 200 gram

SPECIFICATION:

Material	: High-Density Poly-Ethylene Granules
Construction	: 3strand, S- twister, Z-twister
Melting Point	: 130° to 140° C
Density	: 0.93 to 0.97 g/cm ³
Tolerance	: 1.5 mm to 4 mm = +/-7%

CHARACTERISTICS:

- High Strength
- Chemical and UV Resistance
- Water Resistance
- Versatility
- Controlled Elongation
- Low Stretch
- Knot Stability
- Buoyancy

CUSTOMIZATION AVAILABLE:

- Colour
- Size
- Hank Weight

MAJOR USAGE:

- Fishing Aquaculture Line
- Haulers Agriculture and
- Horticulture
